FINGER FOOD

ABSTRACT:

The project make us know about the food which is very tasty to eat, Street food, Healthy food, Food based on our taste and affordable prices for any class type people who are willing to eat the food. To reach the tasty and healthy food to all the people.

Extra Points:

Where can we get the food?

Where can we get food based upon our taste?

Is this food healthy to eat?

How much calories will it contain?

What is the price? Are they affordable to all the people?

Where it is located?

Can we find good food/street food/tasty food near to our place?

Do we have veg and non veg ?

These all questions will be answered by our application called FINGER FOOD. No need to use different apps to get to know about the food you are eating. You will get all the information in this one application within your income which is based on your taste , healthy , food love etc…
